

# CASE STUDY

## R&BS provides cost-effective maintenance for the PA Hospital

R&BS has been working with the Princess Alexandra Hospital in Brisbane for decades — and in that time the team has carried out all kinds of maintenance work, including external waterproofing, concrete roof repairs and external window sealing.

“R&BS are no trouble at all to work with,” enthuses Thomas Chapple, hydraulic maintenance manager. “We continue to deal with them because they’re great at organising everything.”

“They carried out a big job for us recently on the roof membrane of our main building. The roof was completely flat and the existing membrane was leaking, so R&BS graded and sealed it with a new waterproof membrane. We’re really happy with the end result.”

### Cost-effective results

R&BS are committed to providing cost-effective solutions, which is another reason their relationship with the PA Hospital has lasted so many years. Their team of maintenance specialists won’t just consider the quickest and easiest way to do a job — they’ll also aim to provide the most affordable solution.

As Thomas explains: “If we have an issue with our roof or building, we know the guys at R&BS will always try and solve it in the least expensive way possible.”

### Guaranteed warranty

R&BS are proud that their maintenance work endures the test of time — and the unique warranty they provide shows this confidence in their work and products.

“The warranty is great,” agrees Thomas. “It’s guaranteed, so if something happens during the agreed period they’ll come and fix it right away — no dramas.”

“We’re completely satisfied with the work that R&BS have done for us over the past few decades. I’d happily recommend them to other companies.”
